LEG 1B

APRC Flash No. 4

Weather: Fine

Temperature: 22°C

Road Condition: Dry

After SS6 RIKUBETSU LONG 2

DRIVER COMMENTS

1. Gaurav GILL

(The road) is getting more slippery; it is not so easy. We made adjustments to the car, we have been doing it since the morning.

2. Fabian Kreim

The road was rough and deep. Our time was no so bad but we did one or two small mistakes.

3. Michael YOUNG

I suppose (the road) is a little bit rougher. Bumpier in some places, a little bit slow but it is ok. I am keeping it the same, as we are quite close to second place.

4. Hitoshi TAKAYAMA

So far we are driving without any problem., and we will keep going, doing our best.

5. Satoshi IMAI

We are still in the rally. Almost fell off from the road so I will follow what my co-driver tells me.

7. Sanjay TAKALE

I think (the road) is drier, we can get more grip so we can go a bit faster.

8. Tomohide HASEGAWA

Very hot. Suddenly it got hotter. But we are doing well.

11. Fuyuhiko TAKAHASHI

Doing just so-so. A Duct of turbine is almost came off so we fixed with burning our hands, but it was not properly fixed, it seems... That's life.

12. Wataru AONO

Two of our tyres were burst on (SS4) KUNNEYWA, so I drove feeling a bit tired. I think I did my best.

15. Eiichi IWASHITA

The road surface is getting dry now, and the down slope right behind there gave us good grip.

17. Kumiko KOIDE / Tadayuki AKIMA

(AKIMA) The road is getting driver, giving more grips, so we are able to push harder now.

19. Takahiro KITAMI

Comparing the 1st loop, road surface is not much different. But our first priority is to finish the rally, so we are doing just ok.
