## LEG 2

### APRC Flash No. 5

Weather: Cloudy

Temperature: 18°C

Road Condition: Dry

After Stage 14 OTOFUKE REVERSE 2

### DRIVER COMMENTS

1. Yuya SUMIYAMA

It is going ok, but it seems engine lost some power and I have not been able to drive fast enough today. We will check if there is any issue with the engine at the next service. The loss of stage time is so big so I think it is getting worse, but I will try hard

2. Mike YOUNG

We had a problem and had to fix it, thus we lost time, but we managed to fix it ourselves so that we can carry on.

4. Atsushi MASUMURA

I wish there was no yesterday. The car is going all right, so I am checking and learning while driving, with many different settings.

5. Eiichi IWASHITA

The rally has been survival. While we see many minor problems. Just like yesterday I am worried that if I can come back to the Service Park today, as right rotor is broken. I think our mechanics can handle it if we can bring the car back there.

6. Fuyuhiko TAKAHASHI

The road got very rough, and I am glad I can come up to here/

10. Masahiko MIYAMOTO

A pipe went off in the middle of the previous run of this stage (SS10), and we could finally fix it, so it was my first run under normal condition. We will check it thoroughly at next service and prepare for the afternoon.

14. Futoshi MURASE

There was no troubles with car so far. I will do my best to finish the rally.

15. Yasushi AOYAMA

The road was quite rough on the 2<sup>nd</sup> run of the stage. Comparing with the morning, it is not slippery but the road got rough and ruts got deep.

17. Toshihiro INOMATA

This stage got rough, and has deep ruts. In order to make sure I finish the rally, I have to take a safe line which may not be optimal. So even though I think I drove well, I think my stage time was not good.
